Pharmacy Technician

Program Summary: As a Pharmacy Technician you will help the pharmacist package or mix prescriptions, maintain client records, refer clients to the pharmacist for counseling, assist with inventory control and purchasing, as well as collect payment and coordinate billing. This course consists of 200 hours of accelerated classroom training with emphasis on skills mastery through hands on practice and supervision.

Community Job Survey: Starting pay $12 – 20 per hour. Because of the increased pharmaceutical needs of a larger, aging population, growth in this occupation will be almost as fast as the average for all others in the state. According to the US Dept. of Labor the need for Pharmacy Technicians is expected to grow 20% by 2022.

Certification: Upon successful completion, graduates will receive a certificate of completion, become eligible to apply for registration as a Pharmacy Technician in their state and be prepared to take the national Pharmacy Technician Certification Board (**PTCB**) exam.

Schedule: Designed for busy adults, classes are accelerated and can be completed in seven months.

Pre-requisites: At the time of registration, students must be 18 years of age and bring a copy of high school diploma/transcript or G.E.D. Students will be required to have access to the Internet, printing capabilities and an email address. A math and English pre-assessment test will be administered on the first day of class to assure student success. Two references (relatives may not be used) must be completed on forms available through our office.
