TSIA Mathematics Measurements

TSIA Four Content Areas:

- 1) Elementary Algebra and Functions – measures students' knowledge in linear equations, inequalities, and systems; algebraic expressions and equations; word problems and applications.
- 2) Intermediate Algebra and Functions – measures students' knowledge in quadratic and other polynomial expressions, equations, and functions; expressions, equations, and functions involving powers, roots, and radicals; rational and exponential expressions, equations, and functions.
- 3) Geometry and Measurement – measures students' knowledge in plane geometry; transformations and symmetry; linear, area and three-dimensional measurements.
- 4) Data Analysis, Statistics, and Probability – measures students' knowledge in interpreting categorical and quantitative data, statistical measures, probabilistic reasoning.

The new TSIA2 test will begin in Fall 2020. The Four Content Areas remain the same; however, the number of problems per area will change. There will only be an ABE score 1-6 (not a diagnostic score) if the student does not pass the test (numbering will change).

HB5_TSIA_MATH_2018_Measurements pdf file

Sample TSIA DE Mathematics Diagnostic Score Report:

Domain	Needs Improvement	Limited Proficiency	Proficient	Score
Elementary Algebra				15
The results suggest that you have the ability to perform operations with real numbers and algebraic expressions using correct order of operations; solve linear equations, inequalities, systems, and variation problems; graph linear functions; solve word problems.				
Intermediate Algebra				12
The results suggest that you have the ability to factor polynomial expressions by GCF, grouping, difference of squares, trinomials; solve quadratic equations by factoring and using quadratic formula; simplify square roots with numerical values; solve simple equations with radicals and fractions; apply unit conversion in word problems; formulate algebraic expressions and equations to solve word problems; apply rules of exponents.

HB5_TSIA_MATH_2018_Measurements pdf file

Sample TSIA DE Mathematics Diagnostic Score Report:

Domain	Needs Improvement	Limited Proficiency	Proficient	Score
Measurement and Geometry				11
The results suggest that you have the ability to identify and analyze geometric shapes to calculate perimeter, area, and volume; analyze multistep geometric problems using factoring quadratics, use properties of transformations to solve problems, and apply the Pythagorean theorem; analyze and apply ratios and proportions to solve geometric problems such as similar figures; recognize and apply concepts of measurement conversions.				
Data Analysis, Statistics, and Probability				13
The results suggest that you have the ability to calculate and interpret the mean, median, mode, and range for a set of real number values; calculate the probability of events; make predictions using probabilities and statistics; analyze charts and graphs; apply counting principles; calculate percentages.

**Learning Outcomes for Developmental Mathematics/Intermediate Algebra
Spring 2019 Academic Course Guide Manual (ACGM)
Texas Higher Education Coordinating Board (THECB)**

- A. Use appropriate symbolic notation and vocabulary to communicate, interpret, and explain mathematical concepts.
- B. Define, represent, and perform operations on real numbers, applying numeric reasoning to investigate and describe quantitative relationships and solve real world problems in a variety of contexts.
- C. Use algebraic reasoning to solve problems that require ratios, rates, percentages, and proportions in a variety of contexts using multiple representations.
- D. Apply algebraic reasoning to manipulate expressions and equations to solve real world problems.
- E. Use graphs, tables, and technology to analyze, interpret, and compare data sets.
- F. Construct and use mathematical models in verbal, algebraic, graphical, and tabular form to solve problems from a variety of contexts and to make predictions and decisions.
- G. Define, represent, and perform operations on real and complex numbers.

**Learning Outcomes for Developmental Mathematics/Intermediate Algebra
Spring 2019 Academic Course Guide Manual (ACGM)
Texas Higher Education Coordinating Board (THECB)**

- H. Recognize, understand, and analyze features of a function.
- I. Recognize and use algebraic (field) properties, concepts, procedures (including factoring), and algorithms to combine, transform, and evaluate absolute value, polynomial, radical, and rational expressions.
- J. Identify, graph and solve absolute value, polynomial, radical, and rational equations.
- K. Identify, graph and solve absolute value and linear inequalities.
- L. Model, interpret and justify mathematical ideas and concepts using multiple representations.
- M. Connect and use multiple strands of mathematics in situations and problems, as well as in the study of other disciplines.

A thru F are contained in the lower level Developmental Mathematics ACGM Learning Outcomes. G thru M are contained in the Intermediate Algebra ACGM Learning Outcomes.

You Just Realized...

Think of a number. Double it.
Add six. Half it. Take away
the number you started with.
Your answer is three.

1	F	26	Solve Linear Equations with Decimals			

Overall Process

The intent of the spreadsheet is that an instructor reviews the student's Diagnostic Score Report and circles/highlights the concepts that the student needs to study based on the four content areas in the first column. The student can use the last three columns as a check off list as the student proceeds through the concepts. Once the student has studied the material, he or she can either retake the TSI Assessment for Math or take the Central Texas College's College Prep Final Examination.

Two Options:

- Retake the TSI Assessment for Math
- Take the CTC College Prep Final Examination

Once the student passes the Final Exam, CTC will assign a temporary TSI waiver for the student. The waiver is only good for CTC not another college.

People's responses to the fact that I am a math major

<https://weheartit.com/entry/50600146>

Low Cost Option in MyMathTest

Student TSIA Remediation Using My Math Test

Central Texas College has created a My Math Test (MMT) program for any CTC student to use as a tool for TSIA prep/remediation.

Cost: \$12.00 to the student directly from Pearson.

Site: www.mymathtest.com

Create a course in MyMathTest by copying the master course ID provided by Central Texas College.

Students can then enroll in the copied course by using the course code created above.

A dark red, textured background featuring a faint world map. The map is centered, with the continents visible in a slightly lighter shade of red against the darker background.

MyMathTest Setup

The course contains two diagnostic tests: Beginning Algebra and Intermediate Algebra. They are separated into the two levels on the TSI Assessment. Each test has 50 problems; the students will have 120 minutes to complete each diagnostic.

It is best to complete both tests before starting the remediation practice, then you will have the whole picture of what is missing. Remediation can be done in the Study Plan. The results are already built based on what students get incorrect in the diagnostic test. Students can progress through the concepts by using the Practice Tool and the Quiz Me to prove Mastery. (We recommend using the Show All Chapters.) As mastery occurs the symbol will change to a graduation cap.

The course also contains two Final Exams: Beginning Algebra and Intermediate Algebra. Each test has 25 problems; the students have 120 minutes to complete each Final Exam.

Options to become College Ready

Three Options:

- Retake the TSI Assessment for Math
- Complete the MyMathTest Final Examinations
- Take the CTC College Prep Final Examination

Once the student passes the Final Exam, CTC will assign a temporary TSI waiver for the student. The waiver is only good for CTC not another college.
